Versatile Box for Power or Low Voltage

Mounts Security Cameras, and more on Exterior Walls or Ceilings

8161TR box...the easy way to mount security cameras, detectors and other items, outside.

Arlington's **8161TR box** offers flexible solutions to mounting security cameras, detectors or other items outdoors! You can install a power or low voltage security camera – with mounting holes wider than 4.5" apart – directly to the box and mount it to a wall or ceiling.

For added convenience, positionable threaded openings in the box allow you to install a security camera where you need it now; then install additional cameras or other items later. It holds up to 50 lbs on a ceiling; 10 lbs on a wall.

The 8161 series delivers installation options!

For face-down, wall mounting: **8161BR**, an 8161TR box with a sturdy, built-in mounting bracket.

For mounting on a down rod: **8161BP** It has a threaded base plate on the back of the box for extra protection against moisture.

For corner-mounting of equipment up to 50 lbs: **8161CB**

8161 series...

- Non-metallic, UV rated for long outdoor life
- For interior or exterior use in dry, damp or wet locations
- **OPTION** For cameras with base diameter smaller than 4.5" use Arlington's SC5 CAM-KIT™ camera mounting kit on top of the box.
