

Mounting Plate Solutions for Drywall

MPVTI and MP Series Mounting Plate

MPVTI

- Supports speakers, audio/video/security panels, exit signs, etc.
- Works in 1/2" and 5/8" drywall
- Uses either #6-32 screw or #6 sheet-metal screw
- Made from spring steel with corrosion-protection finish

MP Series Mounting Plate Bracket (Non-Metallic)

- Fast, easy way to install
- No tools required
- Serrated interlocking system secures tightly
- Template points on the brackets eliminate multiple markings during installation
- Recessed design for flush mounting
- Widest application range available today – wall thicknesses from 1/4" to 1-1/4"
- Available in single gang, double gang and a unique 3-4 gang version

Note: For low voltage Class 2 use only

The CADDY® MPVTI is a Versatile Thread Impression for low voltage applications where an electrical box is not required. Since the MPVTI provides a single thread impression, it can be used in multiple quantities to support multi-gang devices. Size and shape are no longer an issue.

The MPVTI fits common dry wall sizes of 1/2" and 5/8". This one support product can be used for dozens of different drywall applications, thereby reducing stock and tool requirements. Simply attach the MPVTI to the drywall opening edge at the mating point of the device screws. It features a serrated grip surface, which provides quick, secure installations.

The CADDY® MP Series Mounting Plate allows for the installation of low voltage datacomm and alarm devices into drywall without installation tools. The bracket eliminates the need for electrical boxes on low voltage Class 2 applications. A serrated interlocking system secures the bracket tightly to drywall. The plastic design has no sharp edges and provides the industry with the widest application range of 1/4" to 1-1/4".
